SLEEVE WITH FOIL

Original and distinctive.

SLEEVE WITH FOIL.

Even high-value products have to win consumers at a glance.
Often it is the first impression that makes a consumer choose a bottle or another.
To win consumers' attention and make them curious, the Aro Group has designed a sleeve with foil.
It is a heat-shrinking film on which foil is laid with a cold process, which turns the bottle extraordinarily shiny.
The elegant metallic effect highlights the label and decoration and the bottle stands out on the shelf.
