DOMING LABEL

Protection and performance.

DOMING LABEL.

The dual role of labels, which show data or information and at the same time enhance the value of a product or a machine from an aesthetic point of view, makes them important and recognizable.
For this reason, labels must guarantee excellent performance and perfect durability.

The Aro Group produces resin labels, a special type of label on whose surface resin is spread. This treatment on the one hand makes the label thicker, and on the other hand forms a protective barrier, which preserves the information printed on the label itself.
