SLEEVE WITH FLUO INK

Maximum visibility even in low light.

SLEEVE WITH FLUO INK.

The products dedicated to a demanding and particular business, such as night clubs and all places in poor lighting conditions, need to be highlighted, so that consumers notice and identify them.

For this type of situation, the Aro Group has developed the fluo ink sleeve, a full-body sleeve printed with inks that light up when hit by UV light. It is a product particularly suitable for soft drinks targeted to nightclubs.
