SLEEVE WITH HOLOGRAPHIC FOIL

Refined distinction.

SLEEVE WITH HOLOGRAPHIC FOIL.

The world of wines and spirits today is called to cleverly mix modernity and tradition with the purpose of giving consumers products whose content and shape are carefully designed.
This is why focusing on containers, i.e. bottles, is becoming increasingly important.

The Aro Group has developed a special holographic foil sleeve to have bottles stand out because of elegance and originality.
This is a special heat-shrink film on which a holographic foil is carefully applied, which highlights a decorative detail of the bottle, embellishing the label and the bottle itself and attracting consumers' attention.
