SLEEVE WITH WHITE BACKGROUND

Convenience and value for money.

SLEEVE WITH WHITE BACKGROUND.

For producers of alcoholic beverages, whether they are soft drinks or spirits, coloring the glass is an expensive process.
This adds to the need to decorate the bottle to have the product stand out and attract more consumers.
These two requirements can be met by the same product: the Aro Group's white background sleeve.
This is a heat-shrinking film, which fully wraps the package with a fully white background or a full-body decorative and illustrative graphics. So, you can decide whether to use the sleeve as a base on which a decorative label can be applied, or as a means to decorate the bottle, without the need for painting or treatments.
