LABEL WITH WATER-SOLUBLE ADHESIVE

Concreteness and convenience.

LABEL WITH WATER-SOLUBLE ADHESIVE.

In every sector, the cost of raw materials and attention to the environment are important aspects, which every producer increasingly holds in high regard.
For example, in the beverage and wine sector, the possibility of recovering and reuse glass bottlesis an excellent solution and meets both requirements.

To support companies sharing this philosophy, the Aro Group has produced labels with water-soluble adhesive.
These are uncoated paper labels whose glue loses its power when in contact with lukewarm water.
Removing the label becomes easier when bottles are dipped in water.
