

## **CARDBOARD LABEL**

Easy identification.

## CARDBOARD LABEL.

In many sectors, it is not always possible to apply a label to products using adhesive, due to the type of product or the number of products to be identified.

An excellent solution is the cardboard labels of the Aro Group. These are non-sticky boards, usually heat-sealed in blisters, which come with slots and knurls.

This way the blister can be hung using the slot and identification is simple.

**CARDBOARD LABEL** [1]
