BINOCULARS SLEEVE

Convenience and performance.

BINOCULARS SLEEVE.

Bundling a product with a gadget, an accessory or an ancillary product may be a winning marketing choice.
For example, bundling a shampoo with the right conditioner or a sun lotion with an aftersun lotion means enhancing the combined action of two products.

To make this operation simple and convenient, the Aro Group has designed the binocular sleeve, a sleeve consisting of two cylinders joined together: each cylinder can contain one product, but they form a single packaging.
