

LABEL WITH STRIP

Tamper-proof security.

LABEL WITH STRIP.

In the world of cosmetics, it is essential to provide consumers with the certainty that the products are intact and effective. Consequently, a significant value, especially for high-end products, is the possibility of identifying any kind of tampering, whether carried out or attempted.

In order to easily detect the unauthorized openings of paper packagings that contain cakes of soap, the Aro Group has produced the label with strips, which breaks in case of an attempt to open the packaging, making the tamper evident.
