PRE-SPACED LABELS

Aesthetics and convenience.

PRE-SPACED LABELS.

The aesthetic effect of a label or a sticker may sometimes be spoiled by the neutral or colored edge or background of the label itself. The machine is thus enhanced by the design of the label, which is handicapped by the presence of the background.

The pre-spaced labels of the Aro Group can be used for the best performance.
These stickers are carved following the writing contour. The parts that do not form the image are then removed and the result, consisting of the individual adhesive letters, is very effective.
