

WRAPAROUND LABEL

Clarity and convenience.

WRAPAROUND LABEL.

Usually, in the pharmaceutical and cosmetics sectors most information are found on the information slip contained in the packaging. However, alternative solutions can be adopted for clarity's sake.

For example, the Aro Group's wraparound labels can contain all the information in a clear way, also avoiding the risk of mixing it up.

These labels are suitable for cylindrical packagings, which are wrapped all around, thus offering a large printable area, on which all the information normally contained in the information slip can be displayed.
